

One Safe Way

“Our vision is to provide an injury free environment and to promote a healthy life for all of our employees and those that may also be affected by our actions.”

- **‘One Safe Way’** is our vision for the way in which we **all** work.
- It means **all** of us working together towards a common goal of protecting the safety and health of everyone we interact with, this includes contractors, visitors and members of the public.
- **Everyone** has the right to go home safely after a day working for Norse.
- We empower **every** person to speak up if they feel that their safety or health is being compromised.
- Every single person’s good safety practice will make a difference.
